

CHEM 3PC3**Quiz #1**

August 31, 2026

Name: _____

Student Number: _____

SUBMISSION INSTRUCTIONS — READ CAREFULLY

To receive full credit, you must follow these steps:

1. Answer all the questions.
2. Write your solutions on new, separate pages. Do not write your solutions in the margins of this paper.
3. At the top of each solution page, clearly write the corresponding question number (e.g., “**Question 5**”). If you use more than one page for a question, write the question number on each page (e.g., “**Question 5 (Page 1 of 2)**”).
4. **If you cannot solve a question, still attach a page with the question number and write “Blank” or “No Answer” to indicate you attempted it.**
5. **If you are unsure of a complete answer, still attempt the question:** attach a page with the question number and write down any relevant thoughts, formulas, or initial steps. Partial credit may be awarded for demonstrated effort and correct reasoning, whereas a blank answer will receive no credit.
6. Show all your work clearly and legibly. Unorganized or illegible work may not receive credit.

1 Problems

1. Find the derivatives of the following functions:

a) (10 pts)

$$\frac{x}{\sqrt{1-x}}$$

b) (10 pts)

$$\frac{\cos(2x)}{x}$$

c) (5 pts)

$$e^{2f(x)}$$

d) (5 pts)

$$\ln(\sin(x))$$

2. (15 pts) Find $\frac{dy}{dx}$ for the function y defined implicitly by $y^4 + xy = 4$ at $x = 3$, $y = 1$.3. (10 pts) Derive the formula $\frac{d}{dx}a^x = M(a)a^x$ directly from the definition of the derivative, and identify $M(a)$ as a limit.
